

## Protect your critical components

ATTACC Network Monitor continuously monitors the health and availability of vital infrastructure components. ATTACC Network Monitor provides the functionality necessary to ensure maximum availability of mission-critical server applications and resources. Affordable and easy to configure, ATTACC Network Monitor helps to quickly isolate problems and avoid lost revenue due to resource downtime. ATTACC Network Monitor has built-in monitors, alerting, reporting/dashboard and integration with ATTACC Service Desk.

### System Requirements

- Operating System Windows® Server 2003 SP2 (32 or 64 bit)
- Windows® Server 2008 SP1 (32 or 64 bit)
- Database Microsoft® SQL 2005 or 2008
- Microsoft® SQL Express 2005 or 2008
- Memory 1 gigabyte (GB) RAM or higher
- Disk space 500 megabytes (MB) of free disk space
- Network Connection 100 Mbps minimum
- Other Microsoft® .NET Framework 2.0 and 3.5
- Optional Email connectivity requires SMTP

### Windows Console

- Operating System Microsoft® Windows® XP SP3 (32 or 64 bit)
- Microsoft® Windows® Vista SP1 (32 or 64 bit)
- Memory 1 gigabyte (GB) RAM or higher
- Network Connection 256 Kbps minimum, 100Mbit recommended
- Display 1024 x 768 or higher resolution
- Other Microsoft® .NET Framework 3.5

### Features

- 12 monitor types
- Agentless monitoring
- Email alerts
- Seamless integration with the ATTACC Service Desk to easily start a Quick Incident which can be automatically closed (manually or automatically) upon issue resolution
- Run a VBScript or PowerShell script on alert
- Configure data retention per monitor
- Customizable Dashboard
- Built-in Reporting
- Event History

### Built-In Monitors

- CPU Monitor
- Disk Monitor
- File (age and counts)
- Windows Performance Counters Monitor
- Ping Monitor
- SQL Monitor (can run any stored procedure that returns result sets in a specific format)
- SNMP Monitor
- TCP Port Monitor
- URL (HTML) Monitor
- URL (XML) Monitor
- Windows Service Monitor
- WMI Monitor (built-in WMI browser and query builder)

The screenshot shows the ATTACC Software website. At the top, there is a navigation bar with links for Home, Products, Support, Quote, Company, Contact Us, and Partners. Below this, there are two main sections: 'Service Desk' and 'Network Monitor'. The 'Service Desk' section features a woman's image and text describing it as a major leap in service desk functionality. The 'Network Monitor' section features a server rack image and text describing its continuous monitoring capabilities. On the right side of the page, there are buttons for 'Personal Demo', 'Request Pricing', and 'Download Trial'. At the bottom, there is a 'News' section with a date 'April 30' and a headline 'ATTACC streamlines the service desk with v2.0 release'.

**ATTACC Network Monitor seamlessly integrates with ATTACC Service Desk...**
